7.1.1: Institution has a stated energy policy streamlining ways of energy conservation, of alternate sources of energy for meeting its power requirement

FOR BOYS HOSTEL SOLAR WATER HEATER SYSTEM

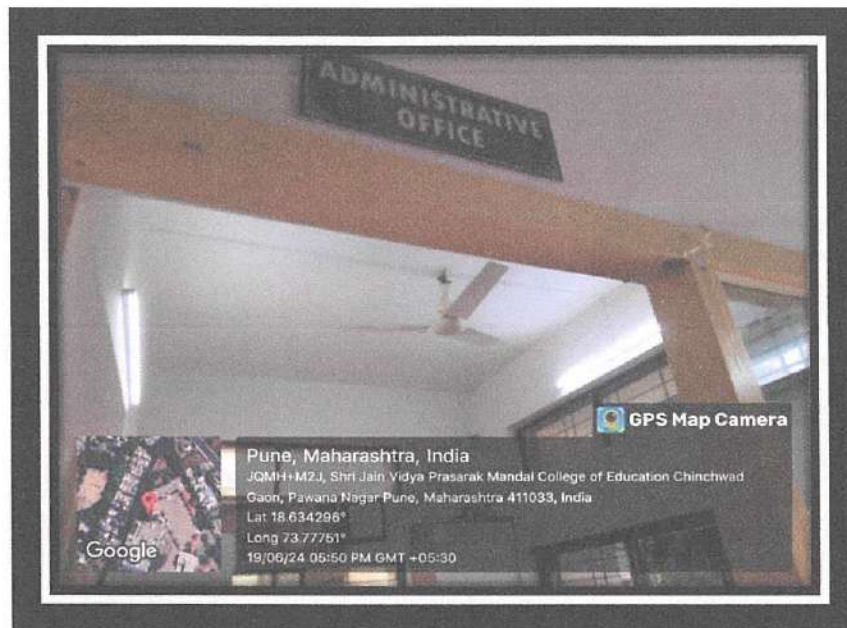

Solar Water Heater A device that uses solar thermal energy to generate hot water A typical solar water heater is mounted on the roof of a children's dormitory and has a solar collector connected to a water storage tank. The sun's rays fall on a collector panel (a component of a solar water heating system). A black absorbent surface (absorber) inside the collectors absorbs solar radiation and transfers heat energy to the water flowing through it. The hot water is collected in a tank and this hot water is used in the hostel.
